In national HIV news, the FDA approved the first extended-release, injectable HIV antiretroviral therapy regimen (cabotegravir and rilpivirine injectable formulation, brand name Cabenuva) on January 21, 2021. Guidance on switching to this regimen when virally suppressed on a 3-drug regimen is outlined in the latest IAS-USA ART guidelines.

President Biden unveiled "The Biden-Harris plan to beat COVID-19" on January 21, including access to free testing, clear and consistent evidence-based prevention guidance, equitable distribution of treatment and vaccines, protecting older people and those at high risk, rebuilding pandemic defense infrastructure, and implementing mask mandates. The 200-page plan can be downloaded here.

Join us on Thursday, February 25, 2021 11-12:30 PM for State of the Pandemic in Alameda County: COVID-19
Conversations on Vaccines, Variants, and More. There will be a presentation, conversation and ample time for live Q&A.
Learn more about the current state of COVID-19 in Alameda County, the vaccine and roll-out, and strategies that will protect your patients, consumers, and community from the virus and misinformation.

EAST BAY COVID-19 UPDATES

COVID-19 daily case and hospitalization rates have decreased over the past three weeks but are still at high levels in the Bay Area. Death rates have begun to decline after record highs. Estimated transmission rates in the Bay Area have been decreasing and are now hovering around 0.8. Bay Area ICU capacity is 18.1% as of February 2.

The highly infectious **U.K. variant has been identified in Alameda County**, with seven cases reported on February 3. The U.K variant (B.1.1.7) is estimated to be 30-70% more transmissible due to mutations on the spike protein. 133 cases have been found across California thus far. Only a tiny fraction of viral samples is sequenced, so it's unknown how far and wide this variant has spread. California is also seeing increasing numbers of two home-grown variants (B.1.427 and B.1.429) but whether they are more infectious or impact vaccine efficacy is unclear.

The Bay Area regional shelter-in-place order was lifted on January 25 because the 4-week ICU capacity projection is above 15%. ICU capacity is projected to be 33% in 4 weeks. Bay Area counties have returned to their purple tier restrictions. Outdoor dining, outdoor gyms, zoos, libraries, hair/nail salons and stores are allowed to reopen with restrictions.

Don't let down your guard! We will need to continue to **wear masks, keep distance and get vaccinated as soon as we can**, especially with more infectious variants in circulation. Please see below for more prevention tips. It's a race against mutants!

Oakland Coliseum will become a mass-vaccination site starting February 16,

Governor Newsom and the Biden-Harris administration announced on February 3. Oakland Coliseum and Cal State LA will be pilot mass vaccination sites co-run by the Federal Emergency Management Agency (FEMA) and the State of California through the Governor's Office of Emergency Services (Cal OES). The two sites were

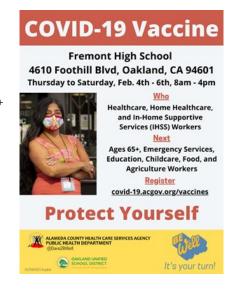

chosen to increase access for communities disproportionately impacted by COVID-19. Registration for vaccine appointments will be available through the state's MyTurn scheduling system in the coming days.

In addition to the Coliseum site, mass vaccination sites are planned in Berkeley, expected to open February 4 for people living in northern Alameda County, and at the Alameda and Solano Fair Grounds.

Vaccinations are available now for health care workers, nursing home residents and elders. Many vaccination sites have opened appointments for people ages 75+ and 65+ though it's been difficult to get appointments due to low supply and high demand. Starting February 8 in Alameda County, essential workers in education/child care, emergency services and food/agriculture will be eligible for vaccines under Phase 1b Tier 1.

California state announced on January 25 that after these groups, the state will shift to prioritization based on age. This means CA will no longer prioritize vaccines by occupation after Phase 1b Tier 1. On February 1, CA Health Officer Dr. Erica Pan announced that the state is still considering a Phase 1b Tier 2 that includes people with high-risk medical conditions. It's still unclear if and how

people living with HIV will be prioritized. There is emerging data that people living with HIV and CD4 counts less than 200

COMMUNITY VACCINE SPOTLIGHT

Amber Taylor, Case Manager at WORLD, says: "I got the vaccine due to working in the public, with a large number of people who are susceptible to catching the virus.

Myself having asthma I am at a greater risk of catching COVID, so getting the vaccine I am protecting myself and the ones I love. I am always around my child, my father who is 65, my grandmother who is 70+, they are all at a greater risk of not recovering fully from this virus, so being around them I need to make sure they are protected at all times."

Health care staff are encouraged to talk with patients and clients about vaccinations to combat misinformation and address concerns. Local clinics report that people are declining vaccines due to misinformation that vaccines cause sterility and/or COVID and fear of feeling sick, like after the flu shot. Communities of color continue to turn to their trusted health

providers for counsel, and providers are changing minds about vaccinations. The ICD-10 code Z71.89 (other specified counseling) may be used for vaccine counseling done in medical provider visits. We are currently researching whether this code alone is sufficient for medical visit billing purposes.

VACCINE ELIGIBILITY AND ACCESS

As of February 3, Alameda County, Contra Costa County, and Solano County are prioritizing vaccinations for health care workers, people in nursing homes and people over the age of 75. Starting February 8 in Alameda County, people ages 65+ and essential workers in education/child care, emergency services and food/agriculture will be eligible for vaccines under Phase 1b Tier 1. Please see the infographic below.

All COVID-19 vaccines should be available at no cost.

To access vaccines, we recommend the following steps:

- 1. Check with your medical provider and/or county for when the vaccine is available for your age or occupation group. See links below.
- 2. When vaccine is available for your group:
 - a. Check if you can get a vaccine through your medical provider first.
 - b. If you cannot get a vaccine through your medical provider, check if you can get a vaccine through a public (county) vaccination site.

Vaccines through medical providers: try these first if you're a member!

- Kaiser members
- Sutter members
- Stanford Health members
- **Community health centers** are also providing vaccine appointments to eligible members. Please contact your provider to find out more.

Vaccines for the public through county vaccination sites: prioritized for people without insurance or those who cannot get vaccinated through their medical provider.

- Alameda County COVID-19 vaccine updates and notifications
 - Starting February 8, people ages 65+ and essential workers in food/agriculture, education/child care and emergency services will be eligible in addition to health care workers and nursing home residents.
 - Notifications will be sent out when vaccines are available for your group from county-supplied sites.

Kaiser and Sutter get their own supply, so members have to check availability with them separately.

- Health care workers need to sign up as "health care providers" to get notifications.
- City of Berkeley vaccine notifications: click here to register
- Contra Costa County COVID-19 vaccine updates and appointments
 - o As of February 3, appointments are available for health care workers and people ages 65+ at county vaccination sites or the Optum Serve site.
 - o To bring equity-related concerns to Contra Costa County's attention, click here.
- Solano County vaccine updates and access points
 - As of February 3, health care workers and people ages 75+ are eligible for vaccinations. Please see info on access at the bottom of this webpage.
 - February 5 and 6: Solano County Fairgrounds in Vallejo will host a mass vaccination site.

Coming soon! Vaccines for the public at mass vaccination sites:

- Oakland Coliseum FEMA site is expected to open starting February 16. Appointments are not available yet as of February 3, so please check back.
- The Berkeley mass vaccination site is expected to open February 4 for people living in northern Alameda County.

Who is eligible for vaccines now?

Health Care Services Agency

Bay Area counties are following CA state guidelines on vaccine prioritization, which were updated on February

Vaccine Prioritization Framework as of 1/25/21 Phase 1a -NOW Phase 1b-NEXT Phase 1c Phase 2 Phase 4 **Health Care** · Essential Workers Tier 1 Moderate · Young Adults · Anyone who did Workers Ages 65+ · Government/ underlying health not access · Children Phases 1, 2 or 3 Essential Workers Tier 1 · Workers not · Water/Waste/ Hospitals · Education/Child Energy/Chemicals Dialysis phases 1 or 2 Emergency **EMTs** · Ages 50+ Services • Ages 16-49 with Long-Term Care · Food/Agriculture Facilities/Skilled underlying health Tier 2 Nursing Essential Workers On 1/25/21, Governor Newsom announced that Tier 2 * Transportation/ Community logistics the State will be shifting to an age-based Health Workers · Industrial/ IHSS/Home framework after Phase 1b, Tier 1 Health Care Residential/ Sheltering On 2/1/21, Dr. Pan announced a Phase 1b Tier 2 Primary care, Critical behavioral with those under age 65 but with comorbidities. health, & specialty providers Incarcerated Tier 3 · Unhoused Dentists Blood Banks Pharmacy Staff Alameda County Alameda County Public Health Department https://covid-19.acgov.org/vaccines

PEOPLE LIVING WITH HIV AND COVID-19 VACCINES

Currently all people living with HIV (PLWH) are recommended to get the COVID-19 vaccine once eligible so long as they don't have severe allergic reactions to components of the vaccines. As of February 3, it's unclear if and how people living with HIV will be prioritized in California as having a medical comorbidity. There is emerging data that people living with HIV and CD4 counts less than 200 are at greater risk for hospitalizations and death.

The Moderna vaccine trial included 179 PLWH and the Pfizer trial included 196 PLWH but data on these subgroups has not been reported separately yet. There is currently no recommendation to check antibody levels for people living with HIV after completing vaccination. We are not sure yet if commercially available SARS-CoV2 antibody tests such as at Quest and LabCorp check for the spike antibodies generated by the vaccines, but providers and patients may consider checking for spike IgG antibody levels two or more weeks after the second vaccine dose while we await more data.

Help the vaccine roll-out effort!

- All Alameda County health care providers are encouraged to enroll in CalVax to become vaccinators.
- To volunteer at a county vaccination site, please register here.

MORE VACCINE RESOURCES

TRENDS IN CASES AND TRANSMISSION RATES

Transmission rates (Re) have improved to 0.80 in Alameda County, 0.79 in Contra Costa and 0.81 in Solano County, and 0.77 statewide. Our goal is to support the vaccine roll-out and community measures around masking, distancing, staying outdoors and avoiding gatherings to keep transmission rates less than 1.

ALAMEDA COUNTY AS OF FEBRUARY 3:

- Purple "widespread" tier week 12.
- 27.5 new cases of COVID-19 per day per 100,000 residents (down from 41.1 last week).
- 5.2% test positivity rate countywide (down from 7.2%).
- 8.2% test positivity in the lowest quartile Healthy Places Index (HPI) census tract (down from 10.8%).
- 0.80 transmission rate on the Cal-CAT model (down from 0.91).

New Alameda County vaccination equity data shows that Latinx and Black health care workers are underrepresented among those who have received vaccinations. The County is investigating this disparity and working with local communitybased organizations to find ways to address it.

Black Americans are getting vaccinated at lower rates than white Americans: Black people have been vaccinated at 2-3 times lower rates compared to white people, including in the first health care workers group. "Access issues and mistrust rooted in structural racism appear to be the major factors leaving Black health care workers behind in the quest to vaccinate the nation." (Kaiser Health News)

A new study projects that in 2020, COVID-19 will reduce US life expectancy disproportionately by race/ethnicity. Life expectancy in the US is estimated to be reduced by 1.13 years overall, with reductions for Black and Latinx people 3 to 4 times that for White people.

A new UCSF study ranks the riskiest jobs in California during the pandemic with food/agricultural workers at highest risk (39% increase in mortality), transportation workers (28% increase) and facilities (27%) and manufacturing workers (23%). Latinx food/agricultural workers experienced a 59% increase in mortality, Black retail workers experienced a 36% increase and Asian health care workers experienced a 40% increase in mortality during the COVID-19 pandemic.

HARM REDUCTION TIPS AND RESOURCES SHOULD I DOUBLE-MASK?

MAXIMIZING MASK PROTECTION

With evidence of the highly infectious U.K. variant circulating in the East Bay, we may be wondering if we should increase our prevention efforts.

Wearing two masks on top of each other (double-masking) and 3+ layered masks can provide more protection so long as you can keep them tight on your face. No matter how many layers a mask has, it will not be useful if you can't keep it comfortably on and covering your nose and mouth. Before you go out, please make sure your mask is comfortable and breathable enough to keep on your face!

Here are the qualities that make masks more protective, which we recommend using in indoor public settings (see higher/highest risk settings in our infographic):

• Use tightly-woven fabric or non-woven material, like in surgical masks.

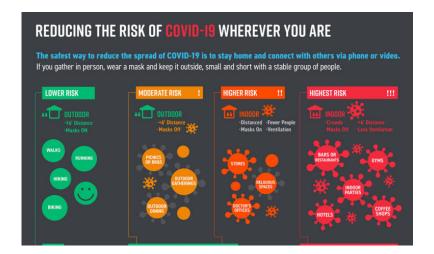

• Use multiple layers:

- 2 layers provide decent protection and 3 or more layers provide maximal protection.
- A non-woven layer, such as a disposable surgical-type mask or filter layer can help repel droplets.
- You can double-mask by using a fitted cloth mask with a disposable surgical-type mask, like in the diagram.
- Consider adding a face shield and/or goggles in the highest risk settings.

• Make it fit tight:

- Use tight/snug cloth masks.
- Reduce top gaps by using masks with adjustable nose wires.
- o Reduce gaps in ear loop masks by tying knots near the sides. (video here)
- o Make sure the mask has a tight seal all around, over your nose, sides of your mouth and under your chin.
- o In high risk work settings, get fit-tested for an N95 mask (the gold standard in protective masks).
- Keep in mind that KN95 masks are not fit-tested and are less protective than N95 masks. Treat them like surgical masks.

References: The mask diagram ("Figure 1") is from "Uniting Infectious Disease and Physical Science Principles on the Importance of Face Masks for COVID-19," by Dr. Monica Gandhi and Linsey C. Marr. Scientific references for these masking tips are located here. As far as we know, there are no peer-reviewed studies on protection from double-masking; evidence from peer-reviewed studies show that the masks with multiple layers and tight fits provide the most protection for both the wearer and others.

Surgical mask

2-layer mask with

Figure 1. Recommended Masks for Public Top: basic: bottom: maximal protection.

COVID-19 harm reduction strategies: Use as many of these as you can!

,	Strategy	% reduction			
	1. Vaccination	95% mRNA EUA vaccines			
	2. Masking	60-95%			
	3. Staying outdoors	~95% in one case series			
₽↔₽	4. Distancing	53-88%			
	5. Eye protection	78%			
200	6. Hand hygiene	28-45%			
	7. Testing/isolation	33%

Our summary of COVID prevention research

References: Bay Area public health guidance on gatherings; summary of evidence and scientific studies

is constantly updated with new studies.

Our COVID-19 prevention and harm reduction infographic is available in English and Spanish!

Please download them here in English and here in Spanish and share with your clients, coworkers, friends and family! To download printable PDF versions, click here for the PDF in English and click here for the PDF in

Spanish.

Free COVID testing sites: Click here for Alameda County, Contra Costa County and Solano County testing sites.

To slow the spread of COVID-19, we all need to stay home when we can and when we go out:

- Wear masks and glasses,
- Stay outdoors whenever possible,
- · Avoid crowds and maintain at least six feet distance from others,
- Sanitize or wash hands frequently, and
- Stay home when sick.

OTHER UPDATES AND OPPORTUNITIES:

Trainings and webinars:

- HIV Grand Rounds with Dr. Stephanie Cohen, Medical Director of the San Francisco City Clinic and Assistant
 Professor of Medicine at UCSF, for the 'Sex (and STIs) in the time of COVID' seminar. This online webinar will be held
 on Wednesday, February 10th, at 12 PM PST via Zoom.
- Join **Dr. Sophy S. Wong** of East Bay Getting To Zero and HealthPAC on Thursday, February 25, 2021 11-12:30 PM for **State of the Pandemic in Alameda County: COVID-19 Conversations on Vaccines, Variants, and More**. There will be a presentation, conversation and ample time for live Q&A. Learn more about the current state of COVID-19 in Alameda County, the vaccine and roll-out, and strategies that will protect your patients, consumers, and community from the virus and misinformation.

Funding Opportunities:

- Youth-serving organizations: There is a new funding opportunity through ETR's Youth Engagement Network. The Youth Engagement Network (YEN) is a 3-year project funded by the Office of Population Affairs that aims to strengthen youth engagement in sexual and reproductive health programs, services and systems change efforts. They are currently seeking to fund organizations to refine and evaluate existing youth engagement interventions. Proposals are due Monday, February 22, 2021. Learn more about the opportunity here.
- The Centers for Disease Control and Prevention (CDC) published the Notice of Funding Opportunity (NOFO) PS21-2104:
 Partnering and Communicating Together. The NOFO seeks to engage strategic partners from across a variety of
 sectors to support the dissemination of messages and resources from the Let's Stop HIV Together campaign to the
 populations and communities most impacted by HIV. The Partnering and Communicating Together funding
 opportunity is part of CDC's efforts to increase HIV awareness, testing, prevention, and treatment under the Ending
 the HIV Epidemic (EHE) initiative.

Job opportunities:

· Urban Leaders Fellowship is a full-time fellowship where fellows spend half of their time working on impactful policy

proposals for an elected or appointed official, and the other half of their time working at a community-based company or organization equally committed to social justice and positive impact. For the ULF Oakland site specifically, fellows will be working out of the City of Oakland's Director of Education and focusing on policy initiatives related to advancing education equity in the Oakland community. Deadlines for the application: February 6th and March 20th. Early applications are encouraged as slots fill up quickly. The dates of the program will be around June 7-July 23.

• The Praxis Project is accepting applications for a paid summer Health Justice Internship. The Health Justice Internship is a great opportunity to engage in health justice policy, public health training, organizational capacity building, and field organizing. This is a remote position, and the pay is \$19-21/hour depending on experience.

California Department of Public Health jobs:

- The Office of Health Equity within the California Department of Public Health provides a key leadership role to reduce health and mental health disparities experienced by vulnerable communities in California. They have an Associate Governmental Program Analyst position open in their Richmond office.
- The STD Control Branch is recruiting to fill a Project Policy Analyst III, Clinical Services Coordinator, position. The Clinical Services Coordinator will provide technical assistance (TA), capacity-building assistance, and consultation to local health jurisdictions (LHJs), STD and sexual health clinics (and other clinics that provide a substantial number of STD and sexual health services), and other relevant stakeholders.

Community resources:

- Covered California announced that effective Feb. 1, anyone uninsured and eligible to enroll in health care coverage through Covered California can sign up through May 15. Sign up for Covered California here.
 - As a reminder, people with HIV with income between 138% and 500% of MAGI FPL can purchase insurance via Covered CA and enroll in ADAP and OA-HIPP to have medication co-pays and insurance premiums paid for by the State of CA Office of AIDS.

HIV services during COVID-19: Click here for Contra Costa HIV services and see our online directory for Alameda County HIV services.

If your organization is in Alameda County and needs COVID-related supplies or staffing, please go to the Emergency Medical Services website to request PPE and testing supplies and request staffing.

Please follow and share our Instagram, Facebook and Twitter accounts.

A note about this webpage: COVID data updates will be posted to this page on Wednesdays in the late afternoon during non-holiday weeks. New studies will be continuously added to our summary of COVID-19 harm reduction strategies. The emailed HIV+COVID-19 update newsletters are now on a bi-weekly schedule of 1st and 3rd Wednesdays.

Official Alameda County COVID-19 weekly updates are accessible on the county website and will not longer be posted on this page. You can sign up to receive the Alameda County weekly COVID-19 newsletter by emailing Jamie.Yee@acgov.org.
